Summary

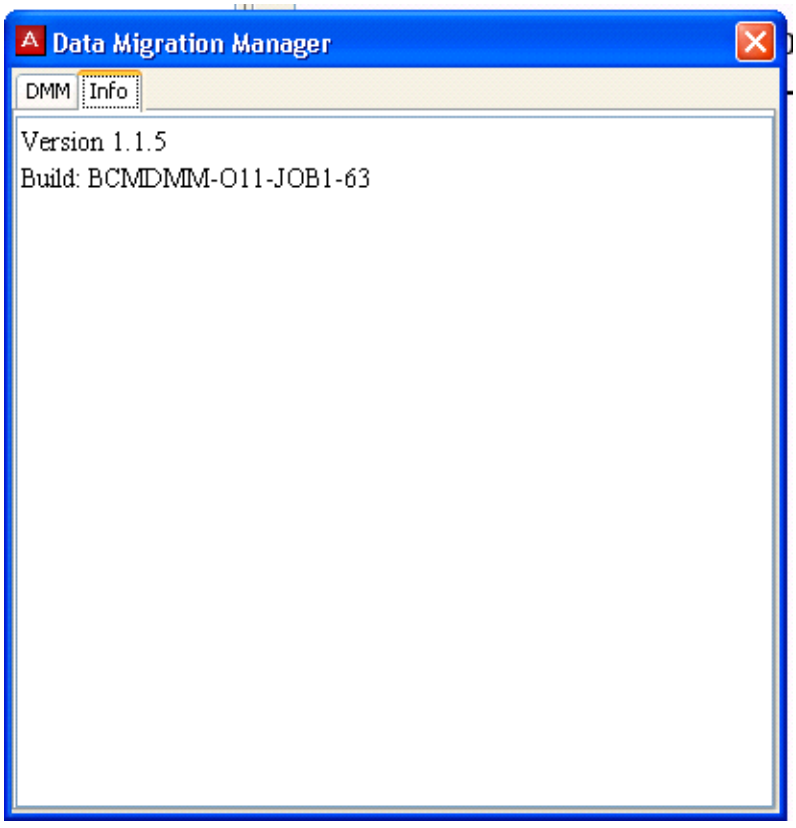
This document is the Engineering Release Note for the Version 1.1.5 of the Data Migration Manager (DMM).

The previous versions of the tool are not automatically uninstalled. To uninstall any previous versions of the tool, perform the following steps:

1. Press Start
2. Select “Programs”
3. Select “Avaya”
4. Select “Business Communications Manager”
5. Select Uninstall

In the window presented, select the version(s) of Data Migration Manager to be uninstalled and press “OK”.

Load Info



Functionality delivered

This version delivers all previously supported functionality. No New functionality is being delivered with this version of Data Migration Manager.

Work Item which have been resolved in this release

Id	Headline
wi00907379	DMM 1.1.3 fails to migrate Voicemail data correctly to target BCM 450 R5. Work around: Due to technical limitations, if any voice message has multiple "TO" list (group message), voice messages will not be migrated to BCM450. An appropriate warning will be shown to user. This has been documented.
wi00965301	DMM 1.1.3 fails to migrate Voicemail data correctly to target BCM 450 R5. When Voicemail migration for one mailbox fails, voicemails of subsequent mailboxes were not migrated too. This update fixes the issue.
wi01018224	SR 1-3653491923: DMM: Call Pilot DN for ring group not updated when migrating from BCM 4.0 to BCM 6.0 This update fixes the issue.
